Preface

This is the Health and Safety Policy for The De La Salle Academy, who will be referred to as 'the Academy'.

The document contains information which must be followed in order to ensure the continued health, safety and welfare of the Academy's employees and contractors whilst continuing to comply with the legislation which governs the work we undertake.

This is a comprehensive document that comprises of the following three sections:

- The Health and Safety Policy Statement.
- The Organisational Duties.
- The Arrangements for Managing Health and Safety.

Health and Safety Policy Statement

This is a general statement of the intentions of the Academy with regard to Health and Safety. The policy statement is signed and dated by the most senior member of the Management Team and therefore indicates that Health and Safety is highly regarded, with full commitment to it from the most senior level of the Academy.

The Organisational Duties

This section commences with a chart showing the safety structure of the Academy. It is followed by a list of individual responsibilities of personnel and contractors.

Arrangements for Managing Health and Safety

This section will contain information that will need to be followed by all levels of management, to ensure that the Academy complies with current legislation and to reduce the risk to all persons who may be affected by the works carried out on the Academy's behalf.

In order to reduce accidents and incidents, all personnel and contractors must adhere to the policies whilst carrying out the Academy's undertakings.

The Academy - The De La Salle Academy

HSE - Health and Safety
Executive

ACoP - Approved Code of Practice

Health and Safety Policy Statement

In accordance with its duty under section 2(3) of the Health and Safety at Work etc. Act 1974, and in fulfilling its obligations to employees and members of the public who may be affected by its activities, the Academy has produced the following statement of policy in respect of Health and Safety:

It is our aim to achieve a working environment that is free of work-related accidents and ill health and to this end we will pursue continuing improvements from year to year.

The Academy recognises its Health and Safety duties under the Health and Safety at Work etc. Act 1974 and the Management of Health and Safety at Work Regulations 1999, and all concomitant

legislation, to ensure, so far as is reasonably practicable, the health and welfare at work of all employees.

Particular attention will be paid to duties required, namely:

- Provision and maintenance of safe plant and systems of work.
- Safe and healthy use, handling and storage of articles and substances.
- Provision of necessary information, instruction, training and supervision.

We undertake to discharge our statutory duties by:

- Identifying hazards in the workplace, assessing the risks related to them, and implementing appropriate preventative and protective measures.
- Providing and maintaining safe plant and work equipment.
- Establishing and enforcing safe methods of work.
- Recruiting and appointing personnel who have the skills, abilities and competence commensurate with their role and level of responsibility.
- Ensuring that tasks given to employees are consistent with their skills, knowledge and ability to perform.
- Ensuring that technical competence is maintained through the provision of refresher training as appropriate.
- Promoting awareness of Health and Safety and of good practice through the effective communication of relevant information.
- Furnishing sufficient resources needed to meet these objectives.

A successful Health and Safety programme is dependent on the participation and co-operation of all employees. All employees are aware that they have a legal duty to:

- Exercise reasonable care for the Health and Safety of themselves and others who may be affected by their acts or omissions at work.
- Co-operate with and assist the employer in meeting statutory obligations.
- Not intentionally or recklessly interfere with anything provided in the interests of health, safety and welfare.

Our Health and Safety Policy will be reviewed annually as a minimum, to monitor its effectiveness and to ensure that it reflects changing needs and circumstances. The Policy will be subject to additional review to reflect changes to legislative requirements, changes to key personnel in the Academy, and advancement in technologies which affect the Academy's activities.

Copies of this Health and Safety Policy Statement will be displayed in the workplace. The full Academy Health and Safety Policy will be available for all employees to read.

All Employees, external Consultants and Contractors employed by the Academy will be expected to comply with this Health and Safety Policy.

Policy Review

The Academy shall review their Health and Safety Policy annually, or more frequently if deemed prudent to do so. This review shall cover all sections of the Policy and shall ensure that:

- The responsibilities reflect the current staffing of the Academy.
- The arrangements remain unchanged.
- The safe working procedures are still applicable.

Additionally, the Policy shall be reviewed as necessary to reflect any changes in Legislation, significant Academy appointments and/or relevant technological advancements.

The Policy review will be completed by the appointed Health and Safety advisors in conjunction with the Academy's appointed personnel. Evidence of the Policy review will be summarised in the table below.

Organisation – Duties, Roles and Responsibilities

Organisation Chart

The Academy have identified and included specific responsibilities in relation to Health and Safety, as they relate to each post in the organisation.

Responsibilities

Principal and Governing Body

The Principal and the Governing Body have ultimate responsibility for ensuring that the Academy fulfils its legal responsibilities that Policy objectives are achieved, and that effective management is in place for the achievement of the policies concerned with health, safety and welfare. Principal will also ensure that Academy policies are reviewed as appropriate, in order to secure continuing compliance with

existing policies, current legislation and any changes in the law. To these ends, they will ensure the allocation of the resources necessary to maintain sound and efficient Health and Safety arrangements.

Management Team

The personnel appointed to these job roles are responsible for implementing this Health and Safety Policy on a day-to-day basis. This includes encouraging and assisting the Academy in reviewing and developing safety procedures and ensuring that established rules and safe working practices are adhered to. They must also ensure that employees are properly trained and receive the support they need to perform their duties. A summary of their duties is as follows:

- Ensure that necessary consideration is given at all times to the requirements of this Health and Safety Policy and, in particular, to the following:
 - Safe methods of working.
 - Induction training including Health and Safety matters.
 - Welfare facilities.
 - Fire precautions.
 - Hazards arising from work activity.
 - Carrying out workplace inspections and advising, as and where necessary, on how to improve methods of working.
 - Investigating accidents and dangerous occurrences and recommending means of preventing recurrence.
 - Advising and assisting with safety training of personnel.
- They know their own responsibilities for implementing this Health and Safety Policy, as well as those of the employees they are responsible for.
- All accidents, incidents, near misses and dangerous occurrences are fully investigated and preventative actions are recommended in close liaison with the Health and Safety Advisor.
- Documented safe systems of work are implemented and are adhered to.
- They are aware of, and implement, all safe working practices and procedures.
- Ensuring that all necessary arrangements are made and maintained in respect of emergency plan(s) and procedures.
- Ensuring that all relevant statutory records are regularly maintained and inspected.
- Ensuring that all activities carried out by Academy employees will not create a risk or hazard to anyone (either employees or non-employees).
- Ensuring, likewise, that no operation carried out by contractors will place employees, or members of the public, at risk.
- Ensuring that all employees are adequately trained and competent to carry out the work allotted to them without risk.
- Ensuring that, where Health and Safety training needs are identified, arrangements for training will be made as appropriate.
- Ensuring that all Academy procedures are adhered to at all times.

Staff

All staff of the Academy will ensure that:

- They are fully conversant with this Health and Safety Policy.
- They co-operate with the Academy in meeting its statutory duties.
- They take reasonable care of themselves and others who may be affected by their acts or omissions.
- They do not intentionally or recklessly interfere with or misuse anything provided in the interest of Health and Safety.
- All accidents, incidents, near misses and dangerous occurrences are immediately reported verbally to their direct Supervisor or Line Manager.
- They are fully conversant with all emergency procedures applicable to the area in which they are working.

- All equipment provided for personal safety is used and maintained in a condition fit for that use, and any defects are reported immediately to their direct Supervisor or Line Manager.
- Where an employee identifies any condition which in his or her opinion is hazardous, the situation is immediately reported to their direct Supervisor or Line Manager verbally, by telephone or e-mail.
- During the course of their normal duties, they use equipment and facilities that are fit and proper for the intended purpose in a safe, correct manner, as provided within the following categories:
 - Arranged, provided and/or otherwise approved by the Academy.
 - Provided by the Client or Contractor with specific authorisation that they may be used by employees of the Academy.
 - Provided for unrestricted use by members of the general public.

Academy-Appointed Contractor/Consultant

The Academy may require, from time-to-time, the services of Contractors/Consultants to undertake specialist or non-routine work activities which Academy employees are unable to undertake. All Contractors/Consultants appointed by the Academy must be able to provide auditable evidence of their competency. A summary of their duties is as follows:

- Will be required to show that they have the necessary expertise and equipment to carry out the particular tasks they have been employed for.
- Will be required to ensure that their work is carried out in a safe manner and that their operatives have been given adequate training.
- Where a Contractor/Consultant is bringing 10 persons or more onto the Academy premises, they will be required to nominate a 'Safety Supervisor'. This person is required to liaise with the Academy management team to ensure that all arrangements for safety, health and welfare are dealt with. The appointed Contractor/Consultant 'Safety Supervisor' will also be required to carefully monitor and supervise the personnel they are responsible for, ensuring compliance with all relevant regulations and the requirements of the Academy Health and Safety Policy.
- Contractors/Consultants are reminded of their responsibilities, not only to their own employees, but also to all other contractors' employees and others who may be affected by their works, including members of the public. They must ensure that the Academy is provided with any information available that may affect Health and Safety on site.
- Where any works of a hazardous or dangerous nature are contemplated, they must provide risk assessments and discuss and agree the most suitable method of carrying out the operation with the Academy prior to commencing work.
- All plant and equipment provided by the Contractor/Consultant for use by their own personnel, requiring regular inspection or testing, must be maintained and tested as required. Copies of all necessary certificates and registers must be available for review by the Academy. Where weekly inspections are required, copies of documentation must be provided to the Academy.
- Contractors/Consultants who will use any material or substances likely to jeopardise the Health and Safety of others must provide the Academy with specific risk assessments (as required by Control of Substances Hazardous to Health Regulations) that provide all necessary and adequate safety measures.
- Where equipment is to be used which is likely to exceed the levels permitted by the Control of Noise at Work Regulations 2005, the Contractor/Consultant should inform the Academy in order to ensure that adequate steps are taken to reduce exposure to Academy employees.
- Contractors/Consultants are requested to ensure that their employees make proper use of any welfare facilities provided by the Academy and that they co-operate fully with the Academy management team.

- Contractors/Consultants are requested to ensure that all fire precautions are taken while working on site, that designated fire escape routes are kept clear at all times, that they provide adequate fire equipment suitable to their tasks, and that they co-operate fully with the site fire plan.
- Contractors/Consultants must inspect their working area at the beginning of every shift to ensure that it is safe to proceed with their task. They are responsible for briefing their personnel on all safety issues on site and providing documentary evidence to the Academy that this has taken place.

Designated Responsibility Summary

Topic	Responsible Department
Health and Safety Policy review	Principal
Health and Safety administration	Academy Management Team
Facility administration	Academy Management Team
Health and Safety training	Academy Management Team
Premises risk assessments	Academy Management Team, Employees
Work activity risk assessments	Academy Management Team, Employees
Display screen equipment assessments	Academy Management Team, Employees
Manual handling assessments	Academy Management Team, Employees
COSHH assessments	Academy Management Team, Employees
Fire risk assessments	Academy Management Team, Employees
Expectant/New mother risk assessments	Academy Management Team, Employees
Young Person risk assessments	Academy Management Team, Employees
First Aid	Academy Management Team
Emergency Planning	Academy Management Team, Employees
Vetting Contractor/Consultants	Academy Management Team
Monitoring of Health and Safety in the workplace	Academy Management Team, Employees
Site inspections	Academy Management Team

Audits	Academy Management Team
Accident, Incident and Near Miss investigations	Academy Management Team

Management Arrangements

Visitors and Third Parties

Academy premises

Visitors to the Academy premises may not be aware of the risks associated with the site, therefore all visitors must:

- Proceed, on arrival, to the reception/office area.
- Be made aware of the Academy requirements and rules for visitors.
- Be accompanied by the person they are visiting, who in turn is responsible for the visitor's safety and ensuring that visitors are aware of any hazardous process or situation they may be exposed to.

Site locations/work areas/premises

Any visitors to work locations that are under the control of the Academy may not be aware of the risks associated with the site, therefore all visitors must:

- Have authorisation from an Academy representative to be in the work area.
- Comply with the site rules that are communicated on arrival.
- Adhere to any designated traffic/pedestrian routes.
- Stay within the site area they have been nominated or instructed to visit.

Safety Training

Preventing accidents and ill health caused by work is a key priority for everyone at the Academy. The Governors recognise that competent employees are valuable and that providing Health and Safety information and training helps them to:

- Ensure their employees are not injured or made ill by the work they carry out.
- Develop a positive Health and Safety culture, where safe and healthy working becomes second nature to everyone.
- Find out how Health and Safety could be managed better.
- Meet legislative requirements.

Members of the Management Team will be provided with all relevant additional training, which will enable them to undertake the Health and Safety responsibilities that have been allocated to them. Members of the Management Team will be responsible for ensuring that the Academy and all its employees maintain the ethos of continual improvement in Health and Safety standards and culture.

A work-based competency matrix will be established for all employees of the Academy. This matrix will provide the Management Team with sufficient information to create a rolling Employee Training and Development plan. The competency matrix will include any identified re-training or refresher dates and will be reviewed on an annual basis, as a minimum, by a nominated member of the Management Team, assisted if required, by the appointed Health and Safety Advisor.

An annual training plan will be established following the review of the employee competency matrix. The plan will include both internal and external training requirements. Specialist training, both operational and required by legislation, will be included.

Records of all training will be included on the competency matrix and copies of attained certification kept on employee personnel files.

Lone Working

The Academy endeavours to avoid lone working whenever possible. However, the Management Team are aware that employees may be required to work alone at either the Academy premises or when visiting/working at clients' premises. The Academy recognises and accepts that it is essential that employees remain safe at all times whilst working on its behalf. Employees are provided (where appropriate) with a mobile telephone (or they can use their own) which will enable communications between them and their appointed member of the Academy Management Team.

All employees must:

- Ensure they have read and understood any specific risk assessments that have been compiled for the activity they are working on.
- Ensure they adhere to any systems developed for their protection while working alone.
- Take personal responsibility for sharing information regarding their whereabouts (time out, location being visited, contact details, expected time of return).
- Report any incidents concerning lone working to enable systems to be reviewed and revised.
- If not returning to the Academy base at the end of the last visit, notify their appointed member of the Academy Management Team to inform them that they have left their client/location and they are okay (or otherwise).

Refusal to Work on the Grounds of Health and Safety

The Academy will take all reasonable measures to ensure that those persons covered by this process (employees, self-employed, contractors/consultants) are aware that their continued employment will not be affected in the event of any invoking of this policy.

The Academy will take all reasonable measures to prevent, so far as it is reasonably practical, any invocation placed on any person by this Policy by planning safe working conditions and taking all factors into account.

Employees, self-employed and contractors/consultants of the Academy will at all times exercise diligence in monitoring their safe working environment for themselves and other persons in the working area.

It is a condition that all employees, self-employed and contractors/consultants shall comply with the following:

If any situation arises which an employee believes will or has resulted in an unsafe working environment for some or all, they must bring their concern to the attention of their direct supervisor so it can be investigated and resolved to an acceptable conclusion, if possible.

- The employee must clearly describe what the concerns or issues actually are.
- If a member of the Academy Management Team cannot be immediately contacted the relevant work should stop.
- The most senior member of staff will check that there are no instructions or information available to resolve the issue.

- If the member of the Academy Management Team does not support the concern, a 'second opinion' is to be sought to either verify the findings or support the concerns.
- Providing the concern is genuine, even if it is ultimately seen to be unfounded, the employee will not be the subject of any detrimental action by the Academy.

Accident, Incident and Near Miss Reporting

Accidents (no matter how minor an injury may be), incidents, and near misses will be included on the Every system at the Academy.

An appropriate investigation of any accident, incident or near miss will be carried out by a member of the Academy Management Team, assisted by the appointed Health & Safety Advisor, if required. The investigation will establish the actual or underlying cause of the incident and will enable the Academy to instigate additional control measures to prevent re-occurrence.

The Academy recognises and accepts the legal duties placed upon them by the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (updated in April 2012) that require them to report and record some work-related accidents by the quickest means possible. The legislation was further updated in October 2013 and a new list of specified injuries implemented to replace the major injuries category

Incapacitation means that the worker is absent or is unable to do work that they would reasonably be expected to do as part of their normal work.

The Academy has a responsibility to still maintain records of over-three day-injuries. The accident book entry will be used as the mechanism for capturing this data.

The deadline by which the over-seven-day injury must be reported has also increased to fifteen days from the day of the accident.

The Academy will report:

- deaths;
- specified injuries;
- over-7-day injuries – where an employee or self-employed person is away from work or unable to perform their normal work duties for more than 7 consecutive days;
- non-fatal accidents to non-workers (e.g. members of the public)
- certain occupational diseases;
- dangerous occurrences – where something happens that does not result in an injury, but could have done;

If an accident has occurred in a work situation then a member of the Management Team will contact the Health and Safety Advisor to discuss the necessary course of action. Relevant accidents/incidents will be reported online via the Health and Safety Executive website.

The Workplace (Health, Safety & Welfare) Regulations 1992

The Management Team ensures that the Academy premises meet the health, safety and welfare needs of all its employees, contractors, members of the public and people with disabilities. Due consideration has been given to the working environment, ensuring it is adequate in respect of ventilation, working temperature, lighting, cleaning materials, traffic routes, falling objects, translucent doors, general welfare, toilets, washing facilities, drinking water and eating facilities.

Welfare facilities are provided by the client when employees are required to work away from the Academy premises. When these facilities are not available, the Management Team ensure that suitable provision is made by either utilising facilities that are readily available to the public (where works are being completed within a 10 hour period) or a purpose-built mobile oasis unit

comprising of sufficient number of toilet and washing facilities (where works are expected to exceed 10 hours).

The Manual Handling Operations Regulations 1992

The Academy is aware of the requirements placed upon it by the regulations. In order to meet these legislative requirements and to protect those employees who may be affected by manual handling activity, the Academy will:

- So far as is reasonably practicable avoid the need for hazardous manual handling.
- Conduct a suitable risk assessment for any hazardous manual handling that cannot be avoided. □
- So far as is reasonably practicable reduce the risk of injury from hazardous manual handling.

Manual handling risk assessments will be conducted by the Management Team, assisted by the Health and Safety Advisor, and will take into account:

- The task being completed and how the risk(s) can be reduced.
- The individual(s) conducting the task and any training requirement.
- The load involved in the activity and any method that could be used to reduce it to a more manageable size.
- The work environment where the activity will take place.

Employees of the Academy are made aware of their responsibilities and duties during the induction process and via a manual handling guidance document. All employees will:

- Follow any implemented safe systems of work.
- Use any supplied equipment in the manner they have been trained to do.
- Co-operate with the Academy on Health and Safety matters.
- Tell their line manager/supervisor if they identify hazardous handling activities.
- Make sure that their work activities do not put others at risk.

The Health and Safety (Display Screen Equipment) Regulations 1992

Employees who use display screen equipment, e.g. PC/laptop users, are required to complete a workstation self-assessment form. Completed forms are reviewed by the Management Team, assisted by the Health and Safety Advisor, and any issues or queries will be discussed with the DSE user. The assessments will consider factors such as the workstation set-up, equipment (chair, keyboard, screen, etc.), the environment (lighting, heating, etc.), and types of work being completed.

The Academy will ensure that free eye/eyesight testing and correction is available for those employees identified as using DSE.

The Management Team ensure that all relevant training and information is provided to an employee to enable them to undertake the work involving DSE in a safe manner.

The Health and Safety (Consultation with Employees) Regulations 1996

The Management Team recognise that having, and maintaining, a mechanism for communicating relevant Health and Safety information is important in establishing an on-going positive Health and Safety culture. To this end, the Academy will consult with employees or their representatives on the following:

- The introduction of any work activity or issue which may substantially affect their Health and Safety at work, for example the introduction of new equipment or new systems of work.
- The contact details of the person nominated as the Academy competent person with regards to Health and Safety.
- Information on the risks and dangers arising from the work activities, measures implemented to reduce or get rid of these risks, and what employees should do if they are exposed to a risk.
- The planning/organisation for Health and Safety training.

Additional information is displayed via the HSE poster displayed in the workplace, safety posters, leaflets, safety pamphlets and verbal safety information.

The Academy encourages all employees to enter into the spirit of the regulations by taking part in discussions with their supervisor/line manager. Any required actions from the discussions are agreed with both parties and escalated through the Management Team for opinion and rectification where necessary. Any action taken as a result of the information given by an employee will be communicated directly to them.

The Academy fully involves, or will involve, non-English speaking employees, including labour only. The Management Team, assisted by the appointed Health and Safety Advisors, will utilise documents that are readily available on the HSE website in different languages. These documents and any specific site instructions will be aided by pictograms and interpreters if required.

The Electricity at Work Regulations 1989

The Academy will ensure electrical equipment is physically capable of doing the job and designed and constructed so that mechanical and electrical stresses do not cause the equipment to become unsafe. Electrical equipment will be visually checked by the user to spot early signs of damage or deterioration. The user's visual check will include:

- Switching off and unplugging the equipment before any checks.
- Checking that the plug is correctly wired (but only if they are competent to do so).
- Ensuring that the fuse is correctly rated by checking the equipment rating plate or instruction book.
- Checking that the plug is not damaged and that the cable is properly secured, with no internal wires visible.
- Checking the electrical cable is not damaged and has not been repaired with insulating tape or an unsuitable connector (damaged cable will only be replaced with a new cable by a competent person).
- Checking that the outer cover of the equipment is not damaged in a way that will give rise to electrical or mechanical hazards.
- Checking for burn marks or staining that suggests the equipment is overheating.
- Ensuring any trailing wires are positioned so that they are not a trip hazard and are less likely to get damaged.

If employees are concerned about the safety of equipment, they are advised to stop it from being used and report the matter to a member of the Management Team, who will arrange for the faulty equipment to be removed from service until a qualified electrician undertakes a more thorough check.

The Personal Protective Equipment at Work Regulations 1992

The Academy recognises that Personal Protective Equipment (PPE) should only be used when risks cannot be avoided or sufficiently reduced by other preventative measures or through work re-organisation. The Academy will ensure that there is sufficient supply of PPE when required

and that all employees are suitably trained in its safe storage and use. All PPE issued must be stored as per the manufacturer's specification.

It is the employee's and sub-contractor's duty to not misuse or interfere with any Health and Safety equipment, including PPE, supplied for their safety.

The Management Team, assisted by the Health and Safety Advisor if appropriate, ensures that a suitable review is completed when more than one type of PPE is being worn, to confirm that each type of equipment is compatible with the other(s) and continues to provide suitable protection for the wearer.

The Control of Substances Hazardous to Health Regulations 2002

Before any hazardous substances are used during a work process, a material safety data sheet (MSDS) will be requested from the supplier and an appropriate assessment made of the risks from that substance undertaken by a member of the Management Team, assisted by the Health and Safety Advisor.

Alternative less harmful substances will be used wherever possible.

Assessments will consider storage, handling, and aspects of use, exposure, PPE requirements, workers' health, and emergency actions. The Management Team will brief employees on any hazard or substance precautions, with written records being held at the Academy premises.

Following the assessment, any substance or material that has a flammable content will be stored in a separate area and held within a metal, fire retardant cabinet.

In order to comply with the legislative requirements placed upon it, the Academy will provide adequate control of exposure to substances by:

- Applying the eight principles of good practice
- *Design and operate processes and activities to minimise emission, release, and spread of substances hazardous to health.*
- *Take into account all relevant routes of exposure - inhalation, skin absorption, and ingestion - when developing control measures.*
- *Control exposure by utilising measures proportionate to the health risk.*
- *Choose the most effective and reliable control options which minimise the escape and spread of substances hazardous to health.*
- *Where adequate control of exposure cannot be achieved by other means, provide, in conjunction with other control measures, suitable Personal Protective Equipment.*
- *Check and review regularly all elements of control measures for their continuing effectiveness.*
- *Inform and train all employees on the hazards and risks from the substances with which they work and the use of control measures developed to minimise the risks.*
- *Ensure that the introduction of control measures does not increase the overall risk to Health and Safety.*
- Ensuring that the Workplace Exposure Limit is not exceeded.
- Ensuring that exposure to substances which can cause occupational asthma, cancer, or damage to genes that can be passed from one generation to another, is reduced as low as is reasonably practicable.

The Work at Height Regulations 2005 (amended 2007)

It is the policy of the Academy to comply with the Work at Height Regulations 2005, which apply to all work at height where there is a risk of a fall liable to cause personal injury. A place is 'at height' if a person could be injured falling from it, even if it is at or below ground level. 'Work' includes moving around at a place of work (except by a staircase in a permanent workplace) but not travel to or from a place of work.

In accordance with these regulations, the Academy will:

- Avoid work at height wherever possible.
- Use work equipment or other measures to prevent falls where they cannot avoid working at height.
- Where a risk of a fall cannot be eliminated, use work equipment or other measures to minimise the distance and consequences of a fall, should one occur.

Before any work at height takes place, the below must be followed:

- If there is an alternative means of carrying out work, which removes the need to work at height, this should be utilised.
- All work at height must be properly planned and organised.
- All work at height must be carried out under appropriate supervision, in as safe a way as is reasonably practicable.

For all work at height, the Academy will:

- Use the most suitable equipment.
- Give collective protection measures (e.g. guard rails) priority over personal protection measures (e.g. safety harness).
- Take account of the work conditions and the risks to the safety of all those at the place where the work equipment is to be used.
- Plan for emergencies and rescue.
- Take into account weather conditions that could endanger Health and Safety.
- Ensure that those working at height are trained and competent.
- Ensure that the place where work at height is done is safe.
- Ensure that the equipment is appropriately inspected.
- Ensure that the risks from fragile surfaces and falling objects are properly controlled. □
Take account of the relevant risk assessments that have been carried out.

The Regulatory Reform (Fire Safety) Order 2005

The Academy will make a suitable and sufficient assessment of the risks to which relevant persons are exposed whilst working at the premises. This assessment will be used for the purpose of identifying the measures they need to take to comply with the requirements and prohibitions imposed on them by the Order. The nature of the assessment will vary according to the type and use of the premises, the persons who use or may use the premises, and the risks associated with that use. The completed risk assessment will be reviewed regularly by the Management Team to ensure it remains up to date and valid, and to reflect any significant changes that may have taken place.

The Academy will ensure systems are in place to check all fire procedures and that monitoring, testing and maintenance of firefighting equipment, emergency lighting and alarm systems, is completed. The Management Team, assisted by the Health and Safety Advisor, will conduct regular tours/inspections of the premises and work activities to ensure that identified control measures have been implemented.

Fire Action signage will be placed in prominent positions throughout the premises to act as a reminder for all employees, visitors, contractors, etc. of the emergency evacuation procedure.

The fire procedures will be under the control of the Management Team, assisted by the Health and Safety Advisor.

The Provision and Use of Work Equipment Regulations 1998

The Academy will ensure that suitable equipment is provided and an assessment of risk is carried out. The assessment considers the current provision of protection and preventative measures. All users of Academy tools and equipment will be suitably trained in their use. The Management Team ensures that all relevant information and instructions on the use of work equipment is readily available to all employees for review.

All tools and equipment purchased, and used by employees, will have suitable control measures to protect employees against risks associated with dangerous parts of machinery, e.g. fixed guards, interlocked guards, etc.

Equipment will be checked prior to use, ensuring that all controls, indicators, switches and displays are clear and free from obstruction, dirt, damage, etc.

All equipment will be maintained in good working order by the Academy. Employees are required to liaise with their Management Team representative if they have any queries or concerns regarding a piece of equipment. The piece of equipment in question will be removed from service to prevent use and a suitable replacement acquired.

The Academy is aware that for larger pieces of equipment, for example a fixed piece of machinery, an immediate replacement is not practical. In this circumstance, the Management Team will arrange for a suitable repair to be completed by a person with the relevant competency and skill set.

On occasions, the Academy may need to hire in equipment, due to specialised work or quantity of work. The equipment will only be obtained from approved hire companies which supply the appropriate training and supporting documentation to ensure all employees and sub-contractors are suitably trained in the use of the equipment.

The Management of Health and Safety at Work Regulations 1999

The Academy will make appropriate arrangements for effective preventative or protective measures identified as a result of risk assessments. The Management Team, assisted by the Health and Safety Advisor, will ensure that:

- All premises and activities subject to risk assessments are assessed in accordance with the relevant legislation, using an appropriate documented format.
- Such assessments are repeated whenever any of the following factors occur:
 - Change in legislation.
 - Change in control measures.
 - Significant change in work carried out.
 - Transfer to new technology.
 - Original assessment is no longer valid.
- Assessments are recorded and copies held at the Academy premises.
- The results of all such assessments are communicated to, and available for inspection by, all employees (an acknowledgement form will be used to ensure that all persons affected by the work activity or premises have read and understood the content and the role they must undertake).
- All assessments identify necessary protective and preventative measures.

- Specific assessments are completed for specified groups – Young Persons, Expectant/New Mothers.

The Academy will monitor safety performance on an informal daily basis by ensuring Health and Safety issues are discussed with employees.

The Health and Safety (First Aid) Regulations 1981

The Academy ensures that a sufficient number of employees are identified and trained in emergency aid and/or are First Aiders. The identity and location of the nominated First Aid employees will be included on notice boards and the specific First Aid signage. First Aid kits will be located throughout the premises and it is the responsibility of the First Aid personnel to ensure that the kits are checked on a regular basis and remain suitably stocked.

Protection of Young Persons

The Academy will ensure that young persons (under 18 years of age) employed by them are protected at work from any risks to their Health and Safety which are a consequence of their lack of experience or because they have not yet fully mentally and physically matured. Therefore, a specific risk assessment will be undertaken before work commences, as part of the induction process for young persons.

Where this concerns a child (not over compulsory Academy age), in addition to carrying out this assessment, its findings must be communicated to a person having parental responsibilities/rights for that child. Where the young person is on a 'relevant' scheme, i.e. work placement, then the placement organisation must be involved in the assessment process.

New and Expectant Mothers

The Academy is aware of the obligations placed upon them by legislation regarding an employee who has notified them in writing that she is a new or expectant mother. When an employee provides written notification (regulation 18 of MHSW) to the Academy stating that she is pregnant, or that she has given birth within the past six months, or that she is breastfeeding, the relevant member(s) of the Management Team will immediately review any risk assessments applicable to the work activity(s) being undertaken. In addition to this review, a member of the Management Team, assisted by the Health and Safety Advisor, will conduct a specific assessment for the employee in question. If this risk assessment has identified any risks to the Health and Safety of a new or expectant mother, or that of her baby, and these risks cannot be avoided by taking any necessary preventative and protective measures under other relevant Health and Safety legislation, then the Academy will take action to remove, reduce or control the risk. If the risk cannot be removed, the Academy will take the following actions:

Action 1 - Temporarily adjusts the employee's working conditions and/or hours of work or, if that is not possible:

Action 2 - Offer her suitable alternative work (at the same rate of pay) if available or if that is not feasible:

Action 3 - Suspend her from work on paid leave for as long as necessary, to protect her Health and Safety, and that of her child.

Violence and Aggression

The Academy, both as an organisation and a Management Team, will not tolerate harassment and violence of any kind. This stance is followed throughout the Academy and includes the relationships between colleagues, employees and client staff, and between staff and any other third party.

Issues of harassment and violence will be treated as disciplinary offences (up to and including dismissal or, if appropriate, criminal action). The list below is an indicator as to what constitutes harassment or violent conduct. It is not an exhaustive list and other issues may be considered by the management team as equal to those listed below:

- Physical violence.
- Verbal violence and aggression (abusive language, swearing).
- Sexual innuendo.
- Intimidation.
- Invasion of personal privacy.
- Exclusion of individuals.
- Abusive or prank phone calls/emails.

False accusations of harassment or violence will not be tolerated by the Academy and may result in the accuser facing disciplinary action.

The Academy will provide support, via the Management Team, to anyone who has been subjected to harassment/violence. This support may include counselling by a health professional.

The Academy will ensure that training is provided to employees to prevent and deal with the risks of harassment and violence.

The Academy will conduct risk assessments for their work activities, and include/consider risks to employees from violence and aggression.

This process includes:

- Planning - thinking ahead and considering situations where violence and aggression could arise.
- Consideration as to who might be harmed and how - in particular, consideration is given to those working alone.
- Communication methods - Are employees in regular contact with the office? Can they call for help if problems arise? What are the client's processes?
- Recording the risk assessment and informing staff of the procedures and controls to follow.

If the risk assessment identifies a risk of violence or aggression, the Academy will develop a procedure which will clearly define the Academy's views and their stance on zero tolerance towards violence and aggression in the workplace.

The Lifting Operations and Lifting Equipment Regulations (L.O.L.E.R.) 1998

The Academy will ensure that lifting equipment will be subjected to an assessment to ensure that the equipment is suitable for the intended task. This assessment will ensure that lifting equipment provided for use at work is:

- Strong and stable enough for its particular use and marked to indicate safe working loads.
- Positioned and installed to minimise any risks.
- Used safely, i.e. the work is planned, organised, and performed by competent people.
- Subject to on-going thorough examination and, where appropriate, inspection by competent people.

Lifting equipment includes any equipment used at work for lifting or lowering loads, including attachments used for anchoring, fixing or supporting the equipment. A wide range of equipment is covered by these regulations including cranes, fork-lift trucks, lifts, hoists, mobile elevating

work platforms, and vehicle inspection platform hoists. The definition also includes lifting accessories such as chains, slings, eyebolts, etc.

The Dangerous Substances and Explosive Atmospheres Regulations 2002

The Academy will ensure that where a dangerous substance is, or **is liable** to be, present, a suitable and sufficient assessment of the risks will be completed by a competent person. The regulation imposes a duty to classify workplaces into hazardous and non-hazardous areas. These areas will be defined and signage indicating their location will be posted around the site.

Where elimination of a substance cannot be achieved, the Academy will:

- Reduce the amount of dangerous substances to a minimum.
- Avoid any minimal release.
- Control the release at source, i.e. by extraction systems.
- Prevent the formation of an explosive atmosphere.
- Following any release, the collection, containment, and removal will be done in a controlled and safe manner. □
- Avoid ignition sources.
- Segregate incompatible substances.
- Ensure that containers of dangerous substances will be appropriately labelled that clearly identify the contents and any associated hazards.

Provide employees with suitable and sufficient information, instruction and training on the appropriate precautions and actions to be taken in order to safeguard themselves and other employees at the workplace, where a dangerous substance is present.

The Academy will put in place procedures and arrangements necessary to deal with an accident, incident, or emergency relating to a dangerous substance in the workplace.

Occupational Health

The Academy will arrange for an Occupational Health Practitioner to conduct pre-employment medical assessments appropriate to the job requirements when necessary.

Hearing tests are included within the pre-employment screening and continued at intervals, as prescribed by the appointed Occupational Health Practitioner.

Health risks are included within the Academy risk assessment process that identifies significant hazards and subsequent control measures/monitoring to be applied.

On-going monitoring of Occupational Health is completed at appropriate intervals by the Management Team and includes the use of a health questionnaire (completion is required for each employee)
